

Ship Refit & Repairs

Offering world wide service 24/7 support

IME can provide teams of skilled personnel to undertake or assist with general welding and fabrication and associated engineering. Teams of personnel can be mobilised within a few hours of initial contact to attend your site or vessel.

From day to day breakdowns to full turnkey projects, we have both the equipment and personnel to manage and deliver your expectations, whether it be land based, alongside repairs or providing riding crews for vessels around the globe.

We are also able to provide a wide selection of other trades with our approved partners and contractors.

This allows us to offer the full turnkey package. This facility gives you peace of mind that all trades are managed at ground level by one management team and all health and safety requirements are adhered to and upheld.

Ship Refit & Repairs

We offer the following:-

- Hydraulic engineers
- Dive teams
